<b>Title</b>	Regular update of CS-ETSO
<b>NPA Number</b>	NPA 2021-07

**UK CAA** (European.Affairs@caa.co.uk) has placed **1** unique comments on this NPA:

<b>Cmt:</b>	<b>Segment description</b>	<b>Page</b>	<b>Comment</b>	<b>Attachments</b>
58	ETSO-2C522 Helicopter Terrain Awareness and Warning System (HTAWS) Advanced Features	117	<p><b>Page No:</b> 118</p> <p><b>Paragraph No:</b> ETSO 2C522, Paragraph 3.2.1</p> <p><b>Comment:</b></p> <p>This states that “Failure of the function defined in paragraph 3.1.1 resulting in false warnings or an unannounced loss of function is a major failure condition”.</p> <p>From this statement, it is unclear whether Mode 1 Red Alerts are included. If so, further information on the rationale for classifying unannounced loss of function with respect to Mode 1 Red Alerts as Major rather than Hazardous would aid understanding of the statement.</p> <p>If the quoted text does not apply to Mode 1 Red Alerts, it may be helpful to add a specific statement to this effect to avoid future confusion.</p> <p><b>Justification:</b></p> <p>The rationale for a blanket classification of failure conditions linked to unannounced loss of function is unclear.</p>
